PROFILE

I am a Web3 Content Creator and Community Architect specializing in decentralized infrastructure, DeFi, SocialFi, and NFTs. With over two years of technical trading experience and proficiency in Python automation, I focus on scaling communities and building technical solutions that drive engagement in the Web3 ecosystem.

CORE COMPETENCIES

- **Web3 & Blockchain:** DeFi, SocialFi, InfoFi, NFTs, Tokenomics Analysis.
- **Community Growth:** X Algorithm Optimization, Audience Architecture, Web3 Creator Management.
- **Automation & Code:** Python (Pyrogram, Telethon, Tweepy), Next.js, Linux (Fedora/Mint), GitHub/GitLab.
- **Markets & Trading:** Crypto/Forex, MetaTrader 5 (MT5), Liquidation Data Analysis, Risk Management.

COMMUNITIES

Web3 Creators Club | Founder & Owner

An exclusive community built strictly for Web3 creators, focusing entirely on "quality over quantity." This is a gated hub with no regular users—only active creators. We facilitate high-level discussions, strategic networking, and direct collaborations with major Web3 projects.

Web3 Pakistan | Founder & Owner

One of the largest creator communities in the entire Web3 space. Our core vision is to elevate our country's presence in the global Web3 ecosystem, empowering local talent, driving grassroots adoption, and pushing the nation forward in decentralized technologies.

EXPERIENCE & CONTRIBUTIONS

Web3 Community Architect & Content Creator

Creators Club Web3 & Independent Communities | Ongoing

- Architect and aggressively scale creator communities within the Web3 ecosystem.
- Develop and deploy custom Python verification bots on Render to automatically validate social engagement and track platform analytics for "@CreatorsClubw3".
- Analyze and optimize content distribution based on evolving X (Twitter) algorithmic changes, visibility parameters, and retweet weights.

Technical Financial Trader

Independent | 2+ Years

- Conduct deep-dive technical analyses of crypto market crashes, evaluating structural liquidations and market maker activities.
- Manage position sizing and lot allocation models for proprietary trading, including participation in FundedNext monthly trading competitions.

PROJECTS & ECOSYSTEMS

- **Ecosystem Collaborations:** Active contributor and collaborator across top-tier Web3 ecosystems and protocols, including: **Monad, 0G Labs, Aptos, Hana Network, Zora, Kaito, Wallchain, and Goat Network.**
